Thanks, Glenn.

Oula and Amelia,

Do you see any issues with bullets two and three under Major Scope Items or with bullets 1 and 3 under Environmental Items or any other areas?

Ken

Ken,

Glover has come back to us with an option to mechanically dredge pond E. He mentions below some E&S necessary for an ash haul road and discharge of both ponds (I think already covered under NPDES).

Subject: Mechanical Dredging

Glenn,

Please see the attached 1-Page summary concluding the work plan/schedule for Mechanically Dredging Pond "E". Through the site visit today I believe we could put a fence up to block Nest PW 1103 if necessary. The action items that need to be addressed in order for this project are erosion control permits for the haul road that will need to be built and discharge of the surface water in Pond D and E. Please contact me if you have any questions. I am working on approximate Decibel levels for equipment.

Thanks
